

Pesticide Notification

District 117 practices Integrated Pest Management, a program that combines preventive techniques, non-chemical pest control methods, and the appropriate use of pesticides with a preference for products that are the least harmful to human health and the environment. Applications of pesticides are made only when deemed necessary to control a pest problem and after trying other means to control the problem. The term “pesticide” includes insecticides, herbicides, rodenticides, and fungicides.

If there is an immediate threat to health or property that requires treatment, please note that ALL parents will be notified via email and/or Infinite Campus Parent Portal Messenger prior to Pesticide application. Please make sure your email address current in Infinite Campus. To update your email address, login to your Infinite Campus Parent Portal account from www.chsd117.org and choose Contract Preferences from the left-hand side.
